

## Silver DVIDA patterns not eligible at NDCA events:

---

### ChaCha

- Syncopated crossovers - syncopated grapevine is not allowed in Silver

### Rumba

- Back swivels and cradle – back swivels are not directly prohibited, but are not explicitly permitted either (please double check with invigilation committee)

### Bolero

- Open Check (timing of pivots is SQ&Q&S, whereas only one syncopation is allowed per 1 bar, so permissible timing will be SQ&QS - also, Swivel takes 4 beats with only one change of weight, when one swivel must take only 2 beats of music at the most.
- Ronde and shadow swivels - everything following a ronde needs to be checked by the Invigilator – positions, man's turn as well as final RtoR hammerlock position
- Curl and double leg ronde – contains Bolero dip, which is only permissible in Gold
- Walks and Grapevine – Lady has a solo syncopated turn with the timing of Q&Q&, which is only allowed if done as an underarm turn in Silver
- Cradle and man's arm bar – the hold (reverse hammerlock might be deemed not permissible, but can be easily changed to R to R hand hold)
- Slow Spiral with back swivels – Spiral timing is too slow - SQQS. Allowed timing is SQQ. Back swivels eligibility need clarification.

### Mambo

- Solo variation – the duration of No Hold is 24 beats, when only 16 consecutive beats apart are allowed
- Continuous Cross Body Leads with Breaks – there is timing of 234&1 is used in the middle of the pattern, which is not allowed in Silver, except for Double U/A turn for leader or follower
- Flick and Kick – timing of 234&1 is used towards the end of the pattern, which should be changed to 2341 to be permissible for Silver level.
